CATALOGUE INDEXING EXAMPLE

GELCOAT® MATERIAL 000 000 020 XX X
 GELCOAT® MAT MATERIAL 000 000 040 XX X
 SOLID® MATERIAL 000 000 060 XX X

XX MEANS COLOUR - ACCORDING TO THE ABOVE COLOUR RANGE / CLASSIFICATION

X means the quantity of tap openings
 0 - without tap opening
 1 - 1 tap opening
 2 - 2 tap openings

ATTENTION! The colours may vary slightly from the actual colours.

MY STORY

My story could begin like a fairy tale: „A long time ago there once lived a human being in a small village... He was interested in exploring the world, meeting people and learning – therefore he left the village and his family in order to get educated...”

We could say that you are reading that story after 40 years but its ending does not have to be different from the fairy tale. Life is about being happy and fulfilled!

I chose a very difficult path by deciding to create something which will be verified a dozen times each day by every person who decides to purchase a bathroom or kitchen sink made by me. That person will not only estimate one day or one moment when the decision is made but throughout many years of trials, also in terms of aesthetics.

I thought: After all, an object which is present in your everyday life, an object you look at and use so often, must be perfect!

Whatever I create can never let down or become boring.

Bogdan Hrab

SINCE 1985

Starkowo

Curious as it may seem, love of hard work must somehow run deep in the genes of Great Poland natives. Is it a wonder we cannot do anything about it? It's more a blessing than anything that we produce highly rated manufactured products. We get up early; we stay up late, adjusting and improving. We perfect details through a magnifying glass, so to speak, leaving no stone unturned. It is the way we are.

For over a quarter of a century, we Marmorin people have espoused an outlook which centres on family, care and persistence. Was it this very Polish pride that was the reason behind the Western European embracement of our industries? Whatever the reasons behind of our success, we have held our own. Even by the demanding standards of the Italian and German market. We are a small Polish company reaching for the highest, furthest and for the greatest scope. We are a business that has matured..

At fairs, exhibitions & presentations etc, we faced the competition and we learned.

In the market place, it is not the business which makes the decisions, but the customer and we have known this always to be true.

Whatever the customer envisages, dreams and searches for, we are in the business to present it to them. From Design, Endurance, Quality, Individuality, Functionality & Trends. (And the next door neighbour's opinions, of course).

HISTORY

Wschowa

Knowledge, experience and the ability of responding to the customers' needs constitutes the wealth behind which a prosaic sink hides.

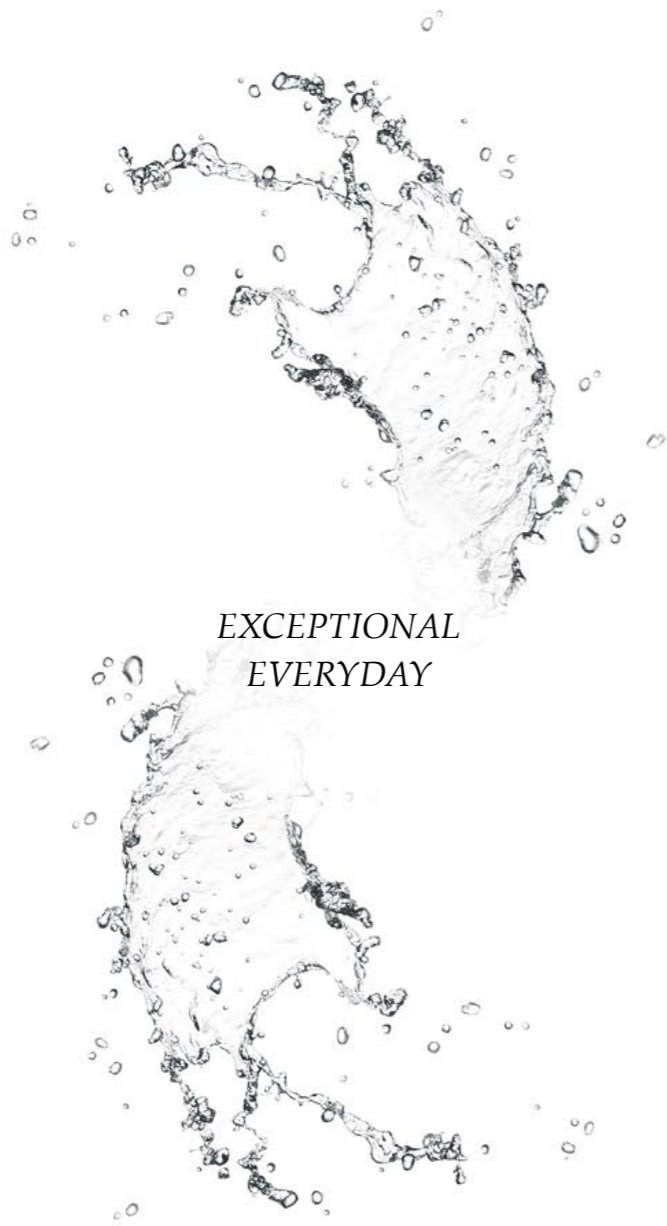

Marmorin was established in 1985. The first years were dedicated to manufacturing countertops from the so-called artificial marble and allowed to begin experimental production. First, our bathroom sinks, then kitchen sinks and shower trays became products meeting the strictest standards and the most demanding requirements of the customers mainly from Western Europe; during the 80s and 90s almost all our products were exported to the markets of the west.

Our solutions offer was expanded by the solid surface technology – material used for production of bathroom sinks and shower trays which is highly appreciated in Europe and the US due to the unique features: freedom and precision of the form, colours, luxurious appearance etc. This convinces and teases the most demanding users.

In 1998 our bathroom sink was awarded with the Budma medal. The prestigious distinction contributed to acquiring new sales markets and thus, new orders. In order to meet the demand, Marmorin expanded its headquarters by a spacious factory in Wschowa. Implementing the ISO 9001 quality assurance system was a must while being eco-friendly, we also implemented the environmental management system, i.e. ISO 14001.

The qualifications of our staff as well as the state-of-the-art technology park allow to quickly introduce innovative designs and permanent high quality of products.

We consider the above to be our main advantage.

*EXCEPTIONAL
EVERYDAY*

*DESIGN AWAKENS SENSES.
PLEASURE OF TOUCH.
VIEW OF A PERFECT SHAPE.
EVERYDAY SATISFACTION.
CONTINUOUS CONTACT WITH PERFECTION.
WITHIN ARM'S REACH. LITERALLY.*

DESIGNSTUDIO

Searching for ideal design to suit the tastes of our customers as well as to meet the requirements of interior design and the character of each house – these are the tasks realized by our design office.

Tasks – challenge.

It requires profound knowledge within the history of architecture as well as the familiarity with the newest interior design trends.

In the Marmorin Design Studio we create exquisite, unique and luxurious products. We welcome new designers, and proudly cooperate with acknowledged Polish interior designers.

MARCIN JĘDRZAK

(born in 1970) graduated from the Faculty of Industrial Design at the Academy of Fine Arts in Poznań. He is a designer and a decorator, since 1999 he has run his own design studio Jędrzak Design. He has designed for Marmorin since 2001.

PIOTR WEŁNIAK

(born in 1972) graduated from the Faculty of Interior and Industrial Design as well as the Faculty of Sculpture at the Academy of Fine Arts in Poznań. He is a designer and a decorator. He designs furniture, interiors, spatial forms and architecture. For years he has worked for the Design Group ETE. He has cooperated with Marmorin company since 2004.

ANITA CHUDECKA

(born in 1972) graduated from the Department of Architecture and Urban Design at the Poznan University of Technology and completed post-graduate studies at the School of Humanities and Journalism in Poznan majoring in Diplomacy and Negotiations. Her everyday occupation includes designing of public use buildings, clinics and houses. She is passionately dedicated to interior design and designing furniture. She has been cooperating with Marmorin since 2010.

MONIKA ELIKOWSKA-OPALA, WOJCIECH OPALA

(born in 1983), (born in 1980) graduated from the Academy of Fine Arts in Poznań, Faculty of Architecture and Design and received a diploma in furniture design. In 2010 they co-established a design studio, i.e. the MOWOstudio designing products, furniture and providing services within interior architecture. They cooperate with manufacturing companies and co-create projects for individual customers. They have been designing for Marmorin since 2010.

MICHAŁ KORSUN

(born in 1971) completed the Faculty of Industrial Design at the Academy of Fine Arts in Warsaw. He is an industrial designer, creator of posters, illustrator and has been developing his brand, KorsunDesign, since 2008. He has been the designer for Marmorin since 2010.

ANNA DUL

(born in 1986) graduated from the Department of Architecture and Design at the Academy of Fine Arts in Poznań; she received a diploma in furniture design. She is a product and furniture designer as well as an interior designer. Within an Educational and Design Programme she has designed the UNI sink for Marmorin which was honoured at the contest entitled "i-Wielkopolska – Innovative for the Wielkopolskie region" organized by the Marshal's Office of the Wielkopolskie Region.

MONIKA BŁASZKOWSKA

(born in 1980) graduate of the Department of Architecture and Urban Development on the Gdańsk University of Technology. She has been conducting business activity within the scope of interior and industrial design since 2005. She is the owner of Moka design which includes in its portfolio numerous interior designs of commercial buildings (mainly medical interiors) in all Poland.

MARCIN KONICKI

(born in 1980) in Połczyn Zdrój graduated from the Department of Architecture and Design of the Fine Arts Academy in Poznań. He obtained a diploma in design with honours. In 2006 he co-created the + - Design studio specialising in product and furniture design, graphics, interior design and cooperating with many companies.

TECHNOLOGIES AND MATERIALS:

GELCOAT® MATERIAL / *GELCOAT*® MAT MATERIAL

In simple words, cultured marble is a dolomite ground into powder and combined with resin. We were the pioneers with regard to this technology; as the first ones in Poland we developed our own cultured marble with unique parameters.

The secret is within the appropriate proportions of the filling material which is a mix of selected dolomite fractions enriched with purifiers combined with resin. This technology allowed us to obtain a monolithic filling material which entirely lacks micro air bubbles which simultaneously prevents the material from separating from the gelcoat.

SOLID® MATERIAL

This is a type of uniform mass combining resin with aluminium oxides. Sinks made in this technology may be glossy or matte. An additional advantage of such products is its lack of combustibility. The Solid® Material products are highly appreciated in Europe and United States.
